Office Action Summary

Art Unit: 1714

1. The response received April 15, 2003 has been made of record claims 1-18 are pending.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chu in view of Berejka.

This rejection is maintained for reasons of record with the exception that claims 13-18 are no longer rejected.

It is the position of the examiner that, if applicants disagree with the statement that amounts taught by Chiu at least overlap those taught by applicant when using the same method of measurement applicants need demonstrate that is untrue.

The reference to Berejka was cited as demonstrating that methylol contents such as claimed by applicant are typical of phenolic tackifiers.

4. Claims 13-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
